

Karbosan

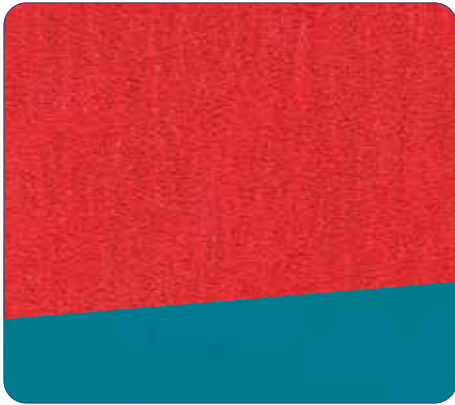

Meet New Karbosan CEYYR53

Take Your Grinding Experience to
The Next Level!

CEYYR53

Made of 100% ceramic abrasive structure and heat-resistant tosize coating, suitable for wet use. Thanks to special X abrasive grains and special formula, it offers high material removal capacity, long life, and consistent performance.

NEW CEYR53

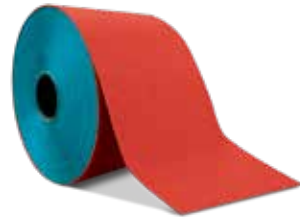

Abrasive	: Ceramic
Backing	: YY Polyester Cloth
Bond	: Resin Over Resin
Coating	: Topsize & Closed
Grit Range	: 36
Features	: Ideal for sanding low alloy steel, stainless steel, high alloy steel, heat resistant steel and cast iron in wide belts, narrow belts and rolls. YY polyester cloth backing with Ceramic abrasive, also with friction and heat resistant Topsize coating. Suitable for wet applications.

New Karbosan CEYR53 Application Areas and Features

Karbosan CEYR53 made of %100 ceramic abrasive structure and heat-resistant tosize coating, suitable for wet use. Thanks to special X abrasive grains and special formula, it offers high material removal capacity, long life, and consistent performance.

- Removes surface irregularities on metal surfaces
- Ensures a smooth and even finish
- Effectively eliminates rust and oxide layers, providing fast and non-damaging cleaning
- Suitable for processing stainless steel, carbon steel, and alloy metals
- Optimized for heavy industry, metalworking, and manufacturing lines.

High Material Removal Rate

Thanks to special ceramic grains and special formula, it provides maximum abrasive performance from the first minute.

Long-Lasting Use

Specially coated abrasive grains wear slower, allowing for less abrasive usage.

High Heat Resistance

Efficient Karbosan tosize prevents material burning and color change, preserving surface integrity.
